

PREPAINTED SPIRAL DUCT

ROUND EXPOSED DUCT

Attractive Look,

Economical,

Energy efficient

Architecturally exposed round spiral duct is commonly used as an integral part of interior design. The reasons are clear: exposed spiral duct looks great, performs efficiently, offers a wide variety of design styles and is economical to install and operate. Because architecturally exposed duct is visible to the occupants of the building, the quality of the product must be superior to that of concealed duct.
